

## Jürgen Caro received Breck Award

---

Jürgen Caro, Professor of physical chemistry at the Leibniz University Hanover, was honored, together with Professor Michael Tsapatsis, University of Minnesota, Minneapolis, MN, USA, with the Donald W. Breck Award of the International Zeolite Association (IZA). The award is named after Donald W. Breck, a former leading zeolite scientist working with Union Carbide Corporation. The Breck Award is granted every three years for the most significant contribution to Molecular Sieve Science and Technology made within the past four years. J. Caro and M. Tsapatsis received the highly prestigious prize at the 17<sup>th</sup> International Zeolite Conference held in Moscow in July 2013, in the presence of almost one thousand participants, for their pioneering work on novel molecular sieve membranes. The photo shows from left to right: A. Corma, Universidad Politécnica de Valencia, Spain, Chairman of the IZA Breck Award Committee; J. Caro, Leibniz University Hanover, Germany; M. Tsapatsis, University of Minnesota, USA; and G. Bellussi, Eni Research, San Donato Milanese, Italy, President of the IZA.
